An individual's Portability rate changes as they attain the next age based on the five year age brackets. An individual's rates are not frozen at the age in which they ported.

Portability premium is based on a monthly rate per \$1,000 of coverage that is billed quarterly. So for billing purposes the monthly rate is tripled.

(Monthly rate per \$1,000 coverage) x (volume of coverage) x (3 months) = Cost per quarter.
