

September 26th, 2024

Property & Casualty Division

State of Connecticut

Insurance Department

To whom it may concern,

On September 20th, 2024, Commissioner Andrew N. Mais, of the Department of Insurance announced the start of a 30-day comment period on the National Council of Compensation Insurance voluntary loss cost and assigned risk filing.

NCCI proposed in its filing a rate decrease of 6.1% for voluntary cost loss coverage and a 6.2% rate decrease for the assigned risk market.

If adopted by the department, these decreases will represent over a decade of workers' compensation rate decreases. These repeated rate decreases are a testament to the effort given by our state's businesses to create the safest workplace in the nation.

The Connecticut Business & Industry Association forwards this letter in strong support of NCCI's recommendations to reduce rates by 6.1% and 6.2% respectively.

We respectfully request the DOI to approve NCCI's recommendations.

Please contact me with any questions.

Sincerely,

Pete Myers, Senior Public Policy Associate

Connecticut Business & Industry Association (CBIA)
